WB Interiors provided full interior design and space planning services for 35,000 SF of first generation office space for a prominent community credit union. Services included programming, preliminary design, construction documents, construction administration, furniture procurement, and art services. Within the space, two floors of general office space boasts interactive spaces such as town centers and upbeat café space. Workstations have a low horizon and are configured much like a private office. The clients desire for a bright and upbeat environment were addressed by using their corporate colors as our design palette. This space also features an executive floor which is a departure from the balance of the space. The color palette was kept very neutral and refined to showcase the newly acquired art collection. Executives enjoy features such as their own town center and a roof garden. Visiting board members are easily accommodated by amenities such as the gathering spaces and library. The boardroom seats 40 persons and features full audio visual/video conferencing capabilities.
